

GRADUATE CERTIFICATE IN EXECUTIVE HEALTH CARE LEADERSHIP

The Graduate Certificate in Executive Health Care Leadership is designed for individuals who seek to understand today's healthcare industry. This certificate is for individuals who want to pursue leadership opportunities in a healthcare clinic, hospital, or long-term care facility. Students will enroll in select courses from the Des Moines University Commission on Accreditation of Healthcare Management and Education (CAHME) – Accredited MHA program. All courses are 100% online and can be applied toward the MHA degree for students who choose to apply to the MHA program after completion of the certificate.

STUDENT LEARNING OUTCOMES

The Graduate Certificate in Executive Health Administration courses include didactic preparation and assessments linked to the National Center for Healthcare Leadership (NCHL) Competency model 3.0.

PROGRAM REQUIREMENTS

To be eligible to apply for admission to the Graduate Certificate in Executive Health Care Leadership at DMU, applicants must have a bachelor's degree from a regionally accredited institution.

Additional information regarding admission to the program can be found on the Graduate Certificate Admissions Requirements [website](#).

PROGRAM APPLICATION PROCESS

Detailed information regarding the process can be found on the MHA program admissions [website](#).

Applicants' admissions accounts will reflect status updates throughout the process.

PROGRAM OUTCOMES

The Graduate Certificate in Executive Health Care Leadership requires completion of 15 credit hours.

TECHNICAL STANDARDS FOR ADMISSION, ACADEMIC PROMOTION AND GRADUATION

The purpose of this document is to specify the technical standards the University deems necessary for a student to matriculate, remain in good standing and ultimately achieve all the competencies necessary for graduation within their program. The University, therefore, requires candidates to confirm their ability to comply with these standards, with or without accommodation, as a condition of admission and on an annual basis thereafter.

Fulfillment of the technical standards for graduation does not guarantee that a graduate will be able to fulfill the technical requirements of any specific residency program or employment setting.

A candidate who is seeking a Graduate Certificate in Executive Health Care Leadership at Des Moines University must be capable of completing core educational requirements and achieving all Foundational Knowledge

items (MPH only), all core competencies (MHA and MPH), and all concentration competencies (MPH) to qualify for graduation. DMU seeks to develop candidates who will acquire a deep and robust knowledge base with the ability to apply it, effectively interpret information, and contribute to decisions across a broad spectrum of public health and/or health care management settings. The critical skills required to be successful are outlined below, and include the ability to observe, communicate, understand, integrate core knowledge and skills, and to behave appropriately in varied educational and professional situations.

Reasonable accommodations may be required by otherwise qualified individual candidates to meet the technical standards specified below. Requests for University-provided accommodations will be granted if the requests are reasonable, do not cause a fundamental alteration of the education program, do not cause an undue hardship, are consistent with the standards of the public health and/or health care management profession, and are recommended by the Accommodations and Educational Support Specialist.

1. Observation: Candidates and students must be able to acquire required information from readings, lectures, educational materials, and demonstrations.
2. Communication: Candidates and students must be able to demonstrate proficiency in the English language such that they can communicate effectively in oral and written form with all members of the public health and/or health care team. Candidates and students must be able to communicate with others in order to elicit and share information. They must have the capacity for comfortable verbal and non-verbal communication and interpersonal skills that enable effective collaboration within a multidisciplinary team. In any case where a candidate's ability to communicate is compromised, the candidate must demonstrate alternative means and/or abilities to communicate.
3. Intellectual, Conceptual, Integrative, and Quantitative Abilities: Candidates and students must have the ability to accurately measure, calculate, reason, analyze, synthesize, problem solve, and think critically. They must also have the ability to participate and learn through a variety of modalities including, but not limited to, digital learning and communication environments, classroom instruction, small groups, teams, and collaborative activities. Candidates and students must be able to concentrate, timely analyze and interpret data, and make decisions within areas in which there is a reasonable amount of visual and auditory distraction.
4. Behavioral Attributes, Social Skills, and Professional Expectation: Candidates and students must be able to effectively utilize their intellectual abilities, exercise good judgment, timely complete all responsibilities, and develop mature, sensitive, and effective relationships with others. Candidates and students must be able to professionally manage heavy workloads, prioritize conflicting demands, and function effectively under stress. They must be able to adapt to changing environments; to display flexibility, to learn to function in the face their own possible biases and of uncertainties inherent in public health and health care management settings, and to not engage in substance abuse. Candidates and students must be able to understand and determine the impact of the social determinants of health and other systemic issues which impact the care of all individuals in a respectful and effective manner regardless of known or perceived race, color, national origin, ethnicity, creed, religion, age, disability, sex, gender, gender identity, sexual orientation, or any other protected status. Professionalism, compassion, integrity,

concern for others, interpersonal skills, interest, and motivation are all qualities that are required throughout the educational process.

REASONABLE ACCOMMODATIONS

Des Moines University welcomes qualified candidates and students with disabilities who meet the technical standards of the program, with or without reasonable accommodations. Students with a disability who may need accommodations during their educational career at DMU will be asked to reaffirm their need for accommodations when acknowledging the ability to meet technical standards annually. The student is responsible for requesting accommodations through the Accommodations and Educational Support Specialist in Academic Support within the Center for Educational Enhancement. Please reach out in person, by email (accommodations@dmu.edu), or by calling Academic Support at 515-271-1516. The Accommodations and Educational Support Specialist reviews all requests for accommodations through an individualized, interactive process.

The use of an intermediary may be a reasonable accommodation while performing some non-essential physical maneuvers or non-technical data gathering. However, an intermediary cannot substitute for the candidates' or student's interpretation and judgement. Intermediaries may not perform essential skills on behalf of the candidate or student, nor can they replace technical skills related to selection and observation.

PROCESS FOR ASSESSING COMPLIANCE WITH THE TECHNICAL STANDARDS

Candidates are required to attest at the time they accept an offer to matriculate that they meet the applicable technical standards, with or without reasonable accommodation, and annually confirm they continue to meet these standards. These standards are not intended to deter any candidate or student who might be able to complete the requirements of the curriculum with reasonable accommodations.

The University will provide reasonable accommodations as may be required by the Americans with Disabilities Act or the Iowa Civil Rights Act

A student whose behavior or performance raises questions concerning his or her ability to fulfill these technical standards may be required to obtain evaluation or testing by a health care provider designated by the University, and to provide the results to the Center for Educational Enhancement to be considered as part of the interactive process to determine possible reasonable accommodations.

Technological compensation can be made with respect to certain technical standards, but candidates and students should be able to perform these standards in a reasonably independent manner.

PHYSICAL HEALTH

In addition to the technical standards set forth, candidates and students must possess the general physical health necessary for performing the duties of a student in the health sciences and a health professional in training without endangering the lives of patients and/or colleagues with whom they might have contact.

COURSE SEQUENCE

Code	Title	Credit Hours
